

Smooove Origin 4 io

4 channel io-homecontrol® wall transmitter

Smooove Origin 4 io

Characteristics

- Power supply: battery CR2430
- Radio range: convenient to control all applications in 1 room
- Working temperature: 0°C to +48°C
- Protection index: IP30
- Delivered with a white frame and a wall bracket

Description and advantages

- The range of io-homecontrol® wall transmitters will be extended with a 4 channel version. Suitable to control different applications like rolling shutters, sun protections, On or Off of lighting and heating and this all in the same room.
- Modern and timeless design, coherent with the design of other Somfy wall controls
- Together with the colored frames, the Smooove fits perfectly in any interior
- Intuitive use
- Control with the Smooove Origin 4 io different applications with one single touch.
- Beside the 4 individual channels, you can create temporary groups by choosing a combination of the 4 channels. This gives the consumer 11 extra combinations.
- The selection of a temporary group is done by pushing on the leds of the desired channels. After that you give the order to all the chosen channels.
- The signals are send consecutively to each channel. The corresponding led blinks when the order is send.
- With the my button, you can easily set, call and modify your favorite position
- Change settings like the modification of an end limit or the my position can't be done while several channels are selected.
- The low power mode, to control Somfy actuators which are powered by a battery, is already activated
